ANIMESH SAMANTA

LARAVEL DEVELOPER

animesh67samanta@gmail.com 9126577584 Kolkata India

PROFILE

I am an experienced Laravel web developer based in kolkata with a proven track record in designing robust web applications. I excel at optimizing software performance through effective troubleshooting and modernizing legacy systems. With strong expertise in Laravel and complementary technologies, I deliver scalable, efficient, and user-centric solutions. My collaborative nature helps me resolve complex issues while adhering to industry best practices.

WORK HISTORY

10/2025
Kolkata, India

Adgion Technology Pvt. Ltd.
Laravel Developer

- Developed and maintained RESTful APIs using Laravel, ensuring high performance, scalability, and clean architecture.
- Built frontend and backend modules for web applications using Blade, and Laravel ecosystem components.
- Integrated AI-driven features such as content generation, text automation, and intelligent suggestions using APIs like Gemini.
- Integrated third-party services (payment gateways, SMS, email providers, social login, etc.).
- Used queues, jobs, and events to optimize application performance and background processing.

02/2023 – 12/2024
West Medinipur

PHP Web Developer, Bluehorse Software Solution

- Boosted system performance through efficient troubleshooting.
- Upgraded outdated codebases, increasing application response speed.
- Collaborated with a team of three developers, reducing project delivery timelines.
- Migrated applications to the latest versions of the Laravel framework.
- Reduced post-deployment errors.
- Customized WordPress themes, leading to an increase in client satisfaction, and boosting revenue.
- Implemented features such as automated email notifications and Laravel pagination, reducing user complaints.
- Created dynamic PDF generation solutions, saving clients time.
- Integrated PhonePe and Razorpay payment gateways, facilitating a minimum of 100,000 in monthly transactions securely.
- Applied object-oriented programming in CorePHP, improving maintainability and saving debugging costs.
- Launched three e-commerce websites.
- Enhanced user experience by implementing AJAX-based form submissions, reducing form submission page load time by 50%.
